

Columna

Design: Hugo de Ruiter, 2016

Columna by Leolux is a very practical table. Round or oval, to ensure that it offers space for the maximum number of guests, without awkward table legs. The table top is available in solid walnut or oak, ceramic or lacquer. A beautiful detail of this subtle table is the way in which the column connects to the leg: like an ancient marble column, smooth or fluted. Columna is also available in XL-versions that have two columns.
