

Tico

Design: Beck Design, 2021

The versatility of the Tico dining-room table is already apparent from the dimensions; it is available in three widths and in no fewer than eight lengths from 140 to 280 cm. The corners and elegant aluminium legs are curved as standard and bend seamlessly with the curve of the table top. A wide range of materials and colours is available for an individual finish, each with its own look; each version is different in solid walnut and oak and ceramic, making Tico a serious candidate for many interiors.
